

ARCHAI-D Inc. — Company Deck (Public Version)

Revolutionizing Decision Systems Through Quantum Resonant Intelligence

Company Overview

ARCHAI-D Inc. is a next-generation AI and quantum systems company developing ethical, auditable, and self-regulating intelligence architectures. Our proprietary QER-GATE, ITR, and RPT/IRST frameworks integrate quantum resonance, lawful synthesis, and multi-perspective triangulation to ensure safety, transparency, and performance across high-impact industries.

Vision & Mission

Our vision is to redefine how artificial intelligence aligns with human ethics and physical law. ARCHAI-D bridges AI with trust, accountability, and multi-domain integration—from medicine and defense to climate systems and robotics.

Core Technologies

- 1 QER-GATE — Ethical control layer using quantum or classical resonance fidelity checks.
- 2 ITR — Intelligent Triangulation Resonance engine optimizing lawful, safe, and efficient actions.
- 3 RPT/IRST — Multi-lawset triangulation protocol achieving robust consensus across diverse systems.
- 4 QRT — Quantum Resonance Triad for synchronized data and energy management across domains.

Target Markets

- 1 Healthcare & Life Sciences – Clinical optimization, ethical automation, and biofeedback intelligence.
- 2 Defense & Aerospace – Secure autonomous systems with embedded lawful controls.
- 3 Robotics & Manufacturing – Adaptive resonance-driven robotics with safe de-escalation protocols.
- 4 Finance & Governance – Trustworthy AI for compliance, auditing, and systemic risk prevention.
- 5 Energy & Climate – Predictive optimization and ethical control in complex energy grids.

Investment Summary

- 1 Stage: Seed Round
- 2 Pre-Money Valuation: \$200M USD
- 3 Capital Raise: \$5M USD for 2.5% equity
- 4 Use of Funds: IP protection, prototype deployment, investor relations, and commercialization.

Leadership Team

- 1 Rolando H. Fabars-Moya — Lead Inventor & Chief Scientist
- 2 Adán Ferrer Romeu — CEO & Co-Founder
- 3 Gregory Martínez — Head of Business & Marketing
- 4 Rolando Zayas — CTO & Systems Architect
- 5 Maykel Molina — Visual Strategy & Communications

Exit Strategy

Potential exit paths include acquisition by major technology firms (Google DeepMind, IBM, NVIDIA, Palantir) or IPO within 5–7 years. The projected ROI exceeds 20x for early investors given the growing global demand for trustworthy AI systems.
