

ARCHAI-D Inc. — Investor Brief (Public Version)

Quantum Resonant Intelligence for Ethical, Scalable, and Safe Decision Systems

Executive Summary

ARCHAI-D Inc. pioneers Quantum Resonant Intelligence — a framework for lawful, auditable, and self-regulating artificial intelligence. Our systems (QER-GATE, ITR, RPT) ensure transparent decision-making and safe automation across healthcare, defense, and advanced robotics.

Market Opportunity

- 1 AI Governance & Safety: \$400B+ projected by 2030.
- 2 Healthcare AI: \$188B+ by 2035 with strong demand for ethics & compliance.
- 3 Quantum Automation & Robotics: core of the next industrial revolution.
- 4 ARCHAI-D integrates ethics and physics into next-gen AI control systems.

Key Differentiators

- 1 Quantum Resonance Triad (QER-GATE, ITR, RPT) enables lawful self-regulation.
- 2 Auditable Proof-of-Decision (PoD) records ensure full traceability.
- 3 Applicable to clinical, defense, and industrial systems simultaneously.
- 4 Designed for global scalability and compliance with ethical standards.

Investment Overview

- 1 Seed Round: \$5M USD for 2.5% equity.
- 2 Pre-Money Valuation: \$200M USD.
- 3 Use of Funds: patent expansion, prototype scaling, investor engagement.
- 4 Expected ROI: 20–30x within 5–7 years (IPO or acquisition).

Leadership Team

- 1 Rolando H. Fabars-Moya — Lead Inventor & Chief Scientist.
- 2 Adán Ferrer Romeu — CEO & Co-Founder.
- 3 Gregory Martínez — Head of Business Development.
- 4 Rolando Zayas — CTO & Systems Architect.
- 5 Maykel Molina — Director of Visual Communications.
